SUBJECT INDEX

African swine fever virus
Perspectives for a vaccine 129
Aujeszky's disease virus
Marker vaccines, virus protein-specific antibody assays and disease control 85
Autographa californica
Expression of *A. californica* nuclear polyhedrosis virus genome in insect cells 73
Avian reovirus
Characteristics and analysis of electropherotypes of field isolates 273
Baculovirus
Expression of *Autographa californica* nuclear polyhedrosis virus genome in insect cells . 73
Bat
Rabies viruses of bats 165
Border disease virus
Pestiviruses: a review 35
Bovine respiratory syncytial virus
Pathogenesis in experimentally infected lambs 267
Bovine rotavirus (Q_{17})
Monoclonal antibodies to Quebec strain (Q_{17}) 283
Bovine spongiform encephalopathy
Detection and quantitation of fibrils, fibril protein (PrP) and vacuolation in brain 295
Bovine viral diarrhoea virus
Pestiviruses: a review 35
ELISA detection of virus specific antibodies using recombinant antigen and monoclonal antibodies 193
Immunohistological detection of virus antigen in the central nervous system of persistently infected cattle using monoclonal antibodies 203
Pathogenesis of mucosal disease and molecular aspects of the virus 371
Caprine arthritis-encephalitis virus
Detected by the polymerase chain reaction (PCR) 329
Cat
Feline retroviruses: a brief review 131
Cattle
Foot-and-mouth disease virus subtyping by sequencing VP1 genes 175
Immunohistological detection of bovine viral diarrhoea virus antigen in central nervous system of persistently infected cattle using monoclonal antibodies 203
Bovine spongiform encephalopathy: detection and quantitation of fibrils, fibril protein (PrP) and vacuolation in brain 295
Round table on infectious bovine rhinotracheitis/infectious pustular vulvovaginitis virus infection diagnosis and control 361
Eradication of infectious bovine rhinotracheitis in Switzerland: review and prospects ... 365
Pathogenesis of mucosal disease and molecular aspects of bovine virus diarrhoea virus 371
Chicken
Fowlpox virus vaccine vector with insertion sites in the terminal repeats: demonstration of its efficacy using the fusion gene of Newcastle disease virus 305
Crystallography
Structural studies of virus particles 11
Distemper
Pathological findings indicative of distemper in European seals 331

Electropherotype
Characteristics and analysis of electropherotypes of avian reovirus field isolates 273
Feline immunodeficiency virus
Feline retroviruses: a brief review 131
Feline leukemia virus
Iscoms 79
Feline retroviruses: a brief review 131
Feline syncytium-forming virus
Feline retroviruses: a brief review 131
Fibril protein
Bovine spongiform encephalopathy: detection and quantitation of fibrils, fibril protein (PrP) and vacuolation in brain 295
Fish
Detection of infectious pancreatic necrosis virus RNA by hybridization with an oligonucleotide DNA probe 211
Molecular cloning of the mRNA coding for the G protein of the viral haemorrhagic septicaemia of salmonids 221
Foot-and-mouth disease virus
Structure of, and implications for physical and biological properties 21
Subtyping by sequencing VP1 genes 175
Fowlpox virus
Fowlpox virus vaccine vector with insertion sites in the terminal repeats: demonstration of its efficacy using the fusion gene of Newcastle disease virus 305
Fox
Oral immunization with avirulent rabies virus mutants 259
G protein
Molecular cloning of mRNA coding for G protein of viral haemorrhagic septicaemia of salmonids 221
Genome organisation
From rabies to rabies-related viruses 115
Molecular biology of transmissible gastroenteritis virus 147
Morbillivirus group: genome organisation and proteins 155
Hog cholera virus
Pestiviruses: a review 35
Nucleotide sequence of virus RNA: properties of the polyprotein encoded by the open reading frame spanning the viral genomic RNA 185
Immunohistology
Immunohistology detection of bovine viral diarrhoea virus antigen in central nervous system of persistently infected cattle using monoclonal antibodies 203
Immunostimulating complex (iscom)
Iscoms 79
Infectious bovine rhinotracheitis
Round table on infectious bovine rhinotracheitis/infectious pustular vulvovaginitis virus infection diagnosis and control 361
Eradication in Switzerland: review and prospects 365
Infectious pancreatic necrosis virus
Detection of virus RNA by hybridization with an oligonucleotide DNA probe 211
Infectious pustular vulvovaginitis
Round table on infectious bovine rhinotracheitis/infectious pustular vulvovaginitis virus infection diagnosis and control 361

Influenza virus
Iscoms 79
Insect cell
Autographa californica nuclear polyhedrosis virus genome expressed in 73
Maedi-Visna virus
Detected by the polymerase chain reaction (PCR) 329
Morbillivirus
Morbillivirus group: genome organisation and proteins 155
Mass mortality in seals caused by a newly discovered morbillivirus 343
Characterisation of the European seal morbillivirus 351
Moredun (BD) virus
ELISA detection of bovine viral diarrhoea virus specific antibodies using recombinant antigen and monoclonal antibodies 193
Newcastle disease virus
Avian Paramyxoviridae – recent developments 103
Fowlpox virus vaccine vector with insertion sites in the terminal repeats: demonstration of its efficacy using the fusion gene of Newcastle disease virus 305
Paramyxoviruses
Avian Paramyxoviridae – recent developments 103
Pestiviruses
Pestiviruses: a review 35
Pig
Marker vaccines, virus protein-specific antibody assays and control of Aujeszky's disease 85
Virus of African swine fever: perspectives for a vaccine 129
Intestinal replication of a porcine respiratory coronavirus closely related antigenically to the enteric transmissible gastroenteritis virus 237
Contribution of molecular biology to the study of the porcine interferon system 245
Rapid detection of pseudorabies virus genomic sequences in biological samples from infected pigs using polymerase chain reaction DNA amplification 317
Polymerase chain reaction (PCR)
Rapid detection of pseudorabies virus genomic sequences in biological samples from infected pigs using PCR DNA amplification 317
Caprine arthritis-encephalitis and Maedi-Visna viruses detected by PCR 329
Round table on infectious bovine rhinotracheitis/infectious pustular vulvovaginitis virus infection diagnosis and control 361
Porcine respiratory coronavirus
Intestinal replication of a porcine respiratory coronavirus closely related antigenically to the enteric transmissible gastroenteritis virus 237
Porcine IFN-α
Contribution of molecular biology to study of porcine interferon system 245
Pseudorabies virus
Rapid detection of genomic sequences in biological samples from infected pigs using polymerase chain reaction DNA amplification 317
Rabies virus
From rabies to rabies-related viruses 115
Rabies viruses of bats 165
Oral immunization of foxes with avirulent mutants 259
Sanger sequencing reaction
Foot-and-mouth disease virus subtyping by sequencing VP1 genes 175

Seal
Pathological findings indicative of distemper in European seals 331
Mass mortality caused by a newly discovered morbillivirus 343
Characterisation of the European seal morbillivirus 351
Sheep
Pathogenesis of bovine respiratory syncytial virus in experimentally infected lambs 267
Caprine arthritis-encephalitis and Maedi-Visna viruses detected by the polymerase chain reaction 329
Tertiary structure
Structural studies of virus particles 11
Structure of foot-and-mouth disease virus: implications for physical and biological properties 21
Transmissible gastroenteritis virus
Molecular biology of transmissible gastroenteritis virus 147
Intestinal replication of a porcine respiratory coronavirus closely related antigenically to the enteric transmissible gastroenteritis virus 237
Contribution of molecular biology to the study of the porcine interferon system 245
Vaccine
Viruses as vectors 55
Marker vaccines, virus protein-specific antibody assays and control of Aujeszky's disease 85
Virus of African swine fever: perspectives for a vaccine 129
Use of vaccinia rabies recombinant for oral vaccination of wildlife 227
Oral immunization of foxes with avirulent rabies virus mutants 259
Fowlpox virus vaccine vector with insertion sites in the terminal repeats: demonstration of its efficacy using the fusion gene of Newcastle disease virus 305
Vaccinia rabies
Use of vaccinia rabies recombinant for oral vaccination of wildlife 227
Vaccinia virus
Viruses as vectors 55
Viral haemorrhagic septicaemia
Molecular cloning of the mRNA coding for the G protein of the VHA of salmonids 221
Virus vector
Viruses as vectors 55
Expression of *Autographa californica* nuclear polyhedrosis virus genome in insect cells . 73
Use of vaccinia rabies recombinant for oral vaccination of wildlife 227
Fowlpox virus vaccine vector with insertion sites in the terminal repeats: demonstration of its efficacy using the fusion gene of Newcastle disease virus 305
VP1 protein
Foot-and-mouth disease virus subtyping by sequencing VP1 genes 175
X-ray diffraction
Structure of foot-and-mouth disease virus: implications for physical and biological properties 21
